

## Element 13

### Aluminum Brightening Acid Replacement

#### Specifications & Properties

**Flash Point:** Not applicable

**Physical State:** Amber liquid

**Flammable:** NO

#### Description

**Element 13** is an innovative product in acid replacement technology. It was developed as an effective user-friendly cleaning alternative to *hydrofluoric acid*. Safe on most materials, this product may be applied in many situations such as aluminum brightening, pre-soak in touchless car washes, de-scaling and de-liming and as an acid presoak.

#### Features & Benefits

- Non-Corrosive to skin
- Readily biodegradable
- Phosphate free
- low odour

#### Applications

- Aluminum tanks
- truck and trailers
- stainless steel and chrome
- cooling fins, etc.

#### Directions

**Element 13** removed oxidation, road films, water scale, soot and mineral deposits from metal surfaces. It can be diluted to suit the application. Suggested dilution range from 4:1 to 10:1. Spray affected area with sprayer, former or pressure washer. Allow product to penetrate & lift deposits. Agitate contaminate if required and **RINSE WITH WATER. DO NOT LET PRODUCT DRY ON SURFACE**

#### Packaging & Handling

Available in 4L, 20L, 205L containers. Product can be stored in high density polyethylene, polypropylene or fiberglass containers.
