

## Aluminum Cleaner/Brightener

### Specifications & Properties

**Flash Point:** Not applicable

**Physical State:** Amber liquid

**Flammable:** NO

### Description

**ALUMINUM CLEANER/BRIGHTENER** is a cleaner that is formulated without hydrofluoric or any other corrosive acid or caustic. It has compliant surfactants and detergents which are safe to the touch, the truck, chrome, rubber, plastic and equipment. Aluminum Brightener does not etch the surface of the metal to “brighten,” a process that eventually leaves your aluminum dull and grey. This product removes the contaminants from the pores of the metal, allowing the natural brightening properties of the metal to shine through and because it is non-corrosive, it is safe to use anywhere on your truck and cab.

### Features & Benefits

- Non-Corrosive
- Safe on all surfaces
- Non-fuming

### Applications

- Automotive
- Heavy equipment
- Trailers
- Tankers

### Directions

Use in concentrations of 1:5 to 1:20 parts of water. After applying, leave on for 3-5 minutes then rinse well with water. Brush where needed with heavy deposits of material.

### Packaging & Handling

Available in 20L, 205L containers. Product can be stored in high density polyethylene, polypropylene or fiberglass containers.
